OFG PROGRESS REPORT - TEAM SETUP (CRM)

CONFIDENTIAL - for internal team use only.

Status: CURRENT (replaces the old Claude.ai Project Knowledge / Claude Project setup guides). Progress reports are generated inside Optimum Credit CRM.

WHAT CHANGED

OLD (do not use for live work):
- Claude.ai Project with "Project Knowledge" PDFs
- Manual narrative + external PDF layout
- Manual upload of a finished report PDF into the case

NEW (use this):
- Client panel -> Reports -> Generate (OFG Progress Report Wizard)
- Upload Before + After credit report PDFs (SmartCredit / bureau pulls)
- Local extract -> staff review -> branded 3-page PDF -> Publish
- Client sees the report in the portal; pipeline advances with the round

WHERE TO OPEN THE WIZARD

---

1. Pipeline -> open the client
2. Reports tab
3. Tap Generate

Available when the case is in Docs Ready or any Round stage (not New Client while Get Started tasks are still pending).

ROUND CHAIN (BEFORE -> AFTER)

Round 1 Before = enrollment / baseline credit PDF
Round 1 After = report after Round 1 work
Round 2 Before = Round 1 After (auto-reused when published)
Round 2 After = report after Round 2 work
... through Round 5

Only override Before if the prior file is wrong. Publish Round N before starting Round N+1 so reuse works.

STAFF FLOW (ABOUT 30 SECONDS AFTER PDFs ARE READY)

Open client -> Reports -> Generate
-> pick round
-> Round 1: upload Before + After
-> Round 2+: leave "reuse prior After as Before" ON; upload new After
-> Run extraction
-> Sanity-check scores, wins, targets, bureau tags, report dates
-> Preview branded PDF -> Publish

WHAT THE CLIENT PDF INCLUDES

Branded Optimum Financial Group PDF (logo, navy / gold):
Page 1 - Middle score hero, TU / EX / EQ before->after charts, wins, targets
Page 2 - Utilization bars, positive accounts, score-change chart
Page 3 - Roadmap / goal gap, file strength, action plan, CROA disclosure

Locale follows the client language (EN / ES) when set on the report.

GOLDEN RULES

[OK] Compare review screen to the source Before / After PDFs
[OK] Wins = removed items; Targets = still reporting
[OK] Fix low-confidence scores and wrong report dates before publish
[OK] Complete CROA attestation; investigate large unexplained drops first

[NO] Do not use the old Claude Project guide as the live workflow
[NO] Do not upload enrollment as Before on every round
[NO] Do not publish if Before/After look swapped

IF SOMETHING LOOKS OFF

- Wrong Before -> uncheck reuse and upload a replacement
- Bad extract -> re-extract or Start over
- Resume drafts from the list at the top of the wizard
- Affiliates cannot run this - staff only

MORE DETAIL

---

docs/OFG_PROGRESS_REPORT_PIPELINE_INSTRUCTIONS.txt
docs/OFG_PROGRESS_REPORT_PIPELINE_GUIDE.pdf (screenshots + same rules)

That's it: one CRM wizard, one branded client PDF per round.
