WHY THIS WORKS FOR THIS FILE

This file has 1 open card at 10.5% utilization. With a thin revolving profile, the TBOM/FORTIVA THD late carries outsized weight; a seasoned, high-limit AU line adds clean revolving history and dilutes it. No new accounts or tradelines during escrow - any change to the file can disrupt underwriting.

5. Personalized Action Plan + File Strength

ACTION PLAN

- 1. Protect the closing. No disputes, new accounts, or tradelines while in escrow. Coordinate with the loan officer on any lender-side rescore.
- 2. Fresh 3-bureau pull after closing to confirm current statuses and see the new mortgage reporting.
- 3. Round 1 - Inquiries: dispute the 12/12/2024 cluster inquiries still reporting without permissible purpose.
- 4. Round 3 - Accuracy: dispute TBOM/FORTIVA THD cross-bureau inconsistencies; personal-info variations; update WESTLAKE SERVICE INC.
- 5. Round 4 - Escalation: TBOM/FORTIVA THD directly with the furnisher if verified.
- 6. Build depth: place the IH-1 AU tradeline and add a primary revolving line; keep BANK OF AMERICA at or below $290.
